

## **SPEAKER RECOGNITION METHOD BASED ON STRUCTURED SPEAKER**

### **MODELING AND A "PICKMAX" SCORING TECHNIQUE**

#### **Abstract of the Disclosure**

5 A technique for improved score calculation and normalization in a framework of  
recognition with phonetically structured speaker models. The technique involves  
determining, for each frame and each level of phonetic detail of a target speaker model, a  
non-interpolated likelihood value, and then resolving the at least one likelihood value to  
obtain a likelihood score.
